CIA IMAGERY ANALYSIS DIVISION

STATUS OF MILITARY FORCES NEAR THE SINO-SOVIET BORDER

A search of all portions of the Sino-Soviet/Sino-Mongolian Border covered on [] was accomplished in accordance with the prescribed procedure of analysing each new mission in an attempt to determine possible changes in the type or level of military activity within 150 nm of the Sino-Soviet/Sino-Mongolian Border (significant items within 300 nm may also be included).

Figure 1 graphically illustrates those portions of the border areas that were covered by photography (cloud cover and other limitations of the photographic quality are not depicted).

The following items of interest were noted on []

WAC 203

SREDNE-BELAYA ARMY BARRACKS AL-1, USSR [] 50 41N-128 02E

New construction activity is noted at this small military installation which is located on the Blagoveshchensk-Belogorsk rail line. One multistory probable barracks, 1 vehicle storage shed, and 2 support buildings are under construction within the installation. An additional 3 vehicle storage sheds and one support building have been constructed since comparative photography

WAC 286

ULAAN BAATAR, MONGOLIA 47 55N-106 55E

A large number of unidentified vehicles were observed in the eastern sector of Ulaan Baatar. One possible military associated vehicle park contained 110 probable cargo trucks, 11 probable utility vehicles, and 40 possible tracked vehicles. Poor photographic quality precluded a more detailed analysis of the type of vehicles within this area.

Another item of interest that is noted on the eastern edge of Ulaan Baatar is the apparent construction of foundations and frames for at least 30 new barracks-type buildings.
